Vimal PK

+91-8838865435 | vimal7pk@gmail.com | linkedin.com/in/vimal-pk | Chennai, Tamil Nadu, India

Professional Summary

Results-driven Full-Stack Developer with expertise in TypeScript, Node.js, and React.js, specializing in building scalable web applications and RESTful APIs. Proven experience in real-time communication using Socket.io and WebSockets, database design and optimization using MySQL, MongoDB, Supabase, and Prisma ORM. Skilled in cloud deployment, SSL/TLS configuration, and version control systems. Strong background in backend architecture, web scraping, and WordPress customization.

Technical Skills

Languages: JavaScript, TypeScript, PHP, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, GraphQL, Microservices Architecture
Databases: MySQL, MongoDB, PostgreSQL, Supabase, Prisma ORM, Redis
Cloud & DevOps: AWS, Azure, FTP Deployment, SSL/TLS Configuration, Let's Encrypt, Nginx
Tools & Technologies: Git, Bitbucket, GitHub, WordPress, Web Scraping, Socket.io, WebSockets, Postman
API Integration: Third-party API Integration, Payment Gateways, OAuth, JWT Authentication

Professional Experience

Backend Developer August 2025 – Present
glasscase.ai *Chennai, Tamil Nadu, India*

- Architected and developed scalable RESTful APIs using Node.js and Express.js, handling 10,000+ daily requests with optimized response times under 200ms
- Designed and implemented database schemas using Prisma ORM with PostgreSQL, reducing query execution time by 40% through efficient indexing and normalization
- Implemented real-time bidirectional communication using Socket.io, enabling live notifications, chat functionality, and data synchronization for 500+ concurrent users
- Implemented JWT-based authentication and authorization systems ensuring secure access control and data protection
- Collaborated with frontend teams to design API contracts and ensure seamless integration between client and server components

Backend Developer August 2025 – December 2025
Pyramidion Solutions *Chennai, Tamil Nadu, India*

- Developed and maintained backend services for multiple client projects using Node.js, TypeScript, and MongoDB
- Built data scraping solutions to aggregate and process information from various sources, improving data collection efficiency by 60%
- Optimized database queries and implemented caching strategies using Redis, resulting in 35% performance improvement
- Configured cloud infrastructure on AWS including EC2 instances, S3 storage, and implemented SSL/TLS certificates using Let's Encrypt
- Participated in code reviews and maintained version control best practices using Git and Bitbucket

Web Developer January 2025 – September 2025
Social Beat *Chennai, Tamil Nadu, India*

- Developed custom WordPress solutions and plugins for client websites, delivering 15+ projects with 98% client satisfaction rate
- Created responsive web applications using React.js and integrated with backend APIs to deliver dynamic user experiences
- Implemented MySQL database solutions for content management and optimized PHP code for better performance
- Deployed applications to production environments via FTP and managed server configurations for optimal security and performance
- Collaborated with design and marketing teams to translate business requirements into technical solutions

Education

Adhiyamaan College of Engineering Tamil Nadu, India
Master of Computer Applications (MCA) – Computer Programming, Specific Applications *Expected 2026*

M.G.R. College of Arts and Science Tamil Nadu, India
Bachelor of Computer Applications (BCA) – Computer Programming, Specific Applications *2024*

Key Projects

Real-Time Collaboration Platform | *Node.js, Socket.io, React.js, MongoDB, Redis* 2025

- Built real-time collaborative application using Socket.io for bidirectional event-based communication between clients and server
- Implemented WebSocket connections handling 1,000+ concurrent users with automatic reconnection and fallback mechanisms
- Designed event-driven architecture with Redis pub/sub for horizontal scaling across multiple server instances

E-Commerce Backend API | *TypeScript, Express.js, Prisma, PostgreSQL, Stripe* 2025

- Developed comprehensive REST API for e-commerce platform with product management, cart, and order processing
- Integrated Stripe payment gateway and implemented secure transaction handling with webhook notifications
- Utilized Prisma ORM for type-safe database operations and implemented role-based access control

Web Scraping & Data Aggregation Tool | *Node.js, Puppeteer, MongoDB* 2024

- Created automated web scraping solution to extract and aggregate data from multiple sources daily
- Implemented data validation, transformation, and storage pipeline processing 50,000+ records per day
- Built RESTful API to expose cleaned data with filtering, pagination, and search capabilities
